SUMMARY

Accomplished Design System Engineer with over 15 years of experience bridging the gap between sophisticated UI/UX design and scalable front-end architecture. Specializing in architecting robust component libraries, establishing automated design token pipelines, and creating comprehensive technical documentation that drives developer velocity and design consistency across enterprise applications.

EXPERIENCE

Privacy Bee, Remote — *Lead Design System Engineer & Front End Developer*

FEBRUARY 2024 - JUNE 2026

- **Architected and established** a scalable enterprise design system for Privacy Bee's core web applications, realizing a **40% increase in product design and development efficiency**.
- **Engineered tokenized component workflows** between Figma and code, ensuring strict compliance with visual design guidelines and fluid multi-platform consistency.
- **Led the end-to-end frontend architecture** of *Buzz*, a secure messaging platform, leveraging component reuse to accelerate time-to-market and drive a 30% surge in user engagement.
- **Conducted technical usability audits** and cross-functional workshops to iterate on component ergonomics, UI accessibility, and API design for internal engineering teams.

SKILLS

Leadership & Collaboration
Personally mentored 100+ designers and engineers through structured workshops and one-on-one coaching to foster cross-functional design system adoption.

Design System Tooling
Figma
Sketch
Miro
Storybook
HTML, CSS, JavaScript

Frontend Engineering
HTML, CSS, JavaScript (ES6+)
Vue, Nuxt
AdonisJS
Node.js

Methodologies
Design Tokens
Component Architecture
Multi-theme Engineering
API Integrations

Sevencube, Remote — *Sr. UI Engineer & Lead Front End Developer*

FEBRUARY 2021 - FEBRUARY 2024

- **Designed and developed** highly reusable UI components and client-facing web/mobile applications utilizing Figma, Vue, and Laravel.
- **Standardized application UI patterns** by replacing fragmented codebases with unified structural layouts, complex authorization UIs, and third-party API display modules.
- **Implemented multi-tenant system solutions**, optimizing front-end performance for advanced features like AI model implementations and Stripe payment interfaces.

GraphicsFlow, Remote — *Sr. Product Designer & Front End Developer*

MAY 2020 - FEBRUARY 2021

- **Spearheaded the creation of a net-new design system** from the ground up, successfully unifying shared component structures and cross-brand visual styles with a sister company.
- **Developed high-fidelity interactive prototypes** in Figma to secure stakeholder alignment and serve as the definitive functional specification for engineering teams.

Tallwave (American Express), Arizona — *Sr. Product Designer*

FEBRUARY 2019 - AUGUST 2019

- **Conducted UX research** and created journey maps to organize hundreds of case studies and scenarios.
- Collaborated with a design team to build a web application for American Express travel agents, enhancing task efficiency.

Swapchain, Arizona — *Director of UI/UX, Front End Developer*

OCTOBER 2017 - JANUARY 2019

- **Co-founded a cryptocurrency startup**, building the foundational brand identity, UI layout systems, and core web application infrastructure from absolute zero.
- **Authored extensive public-facing and internal technical documentation** via Readme.io to formalize implementation rules for smart contract UIs.

Integrate, Arizona — *Sr. Product Designer, Front End Developer*

SEPTEMBER 2015 - OCTOBER 2018

- **Refactored and rewrote legacy web elements** into modular components utilizing AngularJS and strict Material Design standards.
- **Designed wireframes and final UI specifications** for hundreds of production screens, tracking interface telemetry to optimize platform ergonomics.

ReadyCloud, Arizona — *Creative Director*

JULY 2013 - SEPTEMBER 2015

- Designed branding and UI for ReadyCloud's CRM platform, enhancing user experience and customer retention.
