EXPERIENCE

Privacy Bee, Remote — *Lead Product Designer & Front End Developer*

FEBRUARY 2024 - CURRENT

- Led the design and development of the Buzz mobile app, a security-focused messaging platform, ensuring seamless UX and high-performance functionality.
- Spearheaded the creation of a comprehensive design system for Privacy Bee's primary web-based application, enabling consistent and scalable design across teams.
- Designed all wireframes, prototypes, and screens for new web applications using Figma, ensuring alignment with user needs and business goals.
- Conducted extensive UX research to validate and refine design decisions, enhancing user satisfaction and engagement.
- Collaborated with cross-functional teams, including developers and stakeholders, to deliver polished, user-centric products.

Sevencube, Remote — *Sr. Product Designer & Lead Front End Developer*

FEBRUARY 2021 - FEBRUARY 2024

- Designed and built several client-facing web and mobile applications primarily using Figma, Vue and Laravel.
- Conducted comprehensive UX research to inform and validate my design decisions.
- Developed full-scale applications leveraging Vue, Nuxt, and Node.js; engineered robust APIs using Express and PostgreSQL.
- Specialized in advanced features such as authorization systems, Stripe-based payment processing, third-party API integration, and custom AI model implementation.

GraphicsFlow, Remote — *Sr. Product Designer & Front End Developer*

MAY 2020 - FEBRUARY 2021

- Led the design team and built an entirely new design system for the GraphicsFlow application while also matching the guidelines of the

SKILLS

Vue, Nuxt
Adonis

Methods & Strategies

Wireframing
Rapid Prototyping
Interactive Prototyping
User-centered research studies

sister-company InkSoft's style.
- Designed the entire application in Figma and built a master interactive prototype.

Tallwave (American Express), Arizona — *Sr. Product Designer*

FEBRUARY 2019 - AUGUST 2019

- Performed numerous UX studies and exercises with internal clients to organize hundreds of case studies and scenarios.
- Collaborated with the design team to build a brand new web application for travel agents at American Express.

Swapchain, Arizona — *Director of UI/UX, Front End Developer*

OCTOBER 2017 - JANUARY 2019

- Built a cryptocurrency startup from the ground-up utilizing Ethereum smart contracts.
- Led the design efforts and built the entire brand, design system and web application.
- Wrote extensive public-facing and technical product documentation in Readme.io.

Integrate, Arizona — *Sr. Product Designer, Front End Developer*

SEPTEMBER 2015 - OCTOBER 2018

- Implemented front and backend tracking systems to track and analyze user and platform behavior (using Segment, Pendo and data warehouses).
- Conducted all user research and interviews (internal and external), and analyzed platform usage and loading times using Keen.io.
- Created all of the concepts, wireframes and final designs of hundreds of screens for the new version of the Integrate product.
- Fixed hundreds of application bugs reported in JIRA using GIT/Github in HTML, CSS (LESS) and AngularJS as well as doing full rewrites of components from Bootstrap to Google Material.

ReadyCloud, Arizona — *Creative Director*

JULY 2013 - SEPTEMBER 2015

PROJECTS

JubyCards — *Frontend Application Design*

JUNE 2022 - FEBRUARY 2024

- Created a custom profile builder complete with multiple themes, customization options and integrations.
- Created an interactive card builder to allow clients to customize

the design of their JubyCard.

LiftLog — *Frontend, Backend & UI/UX*

DECEMBER 2022 - PRESENT

- Utilized Nuxt 3, HTML and CSS and AdonisJS to build a workout creation and tracking application.
- Created an initial database of over 1000 preset workout movements using Puppeteer, Tesseract and OpenAI.
- Built the auth system, API controllers and database schemas from scratch in AdonisJS.

Medical Appt. Scheduler — *Frontend, UI/UX*

MARCH 2022 - JULY 2022

- Built a frontend scheduling application that clients use to schedule appointments with their doctors.
